Cool aesthetic, and their hearts are definitely in the right place. I love the various encounters that my crew can get into when I send them down to planets. I think it needs a little more time to cook in Early Access, though - there's not quite enough going on "under the hood" to keep me enthralled while I go from system to system and occasionally shoot things.

Were I the developers, I would improve the navigation system and map, so that I can tell where I'm going and where I've been a bit more easily (my strategy thus far has been to go willy-nilly towards whatever jump gate has "???" above it, until I run out of one of the supplies and backtrack frantically looking for a planet rich in that supply). Perhaps a listing of scanned planets could pop up when you hover your cursor over an explored system on the map?

It takes a loooong time to earn an upgrade, which is fine as long as I'm excited to continue the grind. I'm not certain there's a way to save at this point, which makes grinding less palatable.

It also seems a little arbitrary which supplies your crew come back to your ship with. I'd like an option to go for particular supplies, or at least a system that automatically put more emphasis on needed supplies.

I don't want to sound like I'm complaining. This game is probably going to be really spiffy, once it's fully-formed! This is what Early Access is for!. I can't say I recommend this game in its current state. Leaning over objects like tables pushes you backwards, which is very nauseating\disorienting. The game also really needs an inventory system, and an easier way of holding objects for long periods. Obviously it is a work in progress, and the dev appears to be learning as they go. I will continue to check out future updates, and will change my review accordingly if improvements are made.. It's a great game.

So great.

The greatest game.

#MAGA2020. I very good money grab game.. best gta 2016 still being best gta

I really liked this one, though I may be biased since I'm into vampire games.

* You can choose your MC's personality throughout the game, which is very nicely done, since you don't have to be a pushover if you don't want to.

* The 3 guys are awesome and they're very different in personality.

* I liked the characters' sprites a lot, their art is unique from what you usually see in VNs/

* There are no voiceovers but in my book that's a good thing (not a fan of English voices).

* Rather short, but that's expected for that price.

. This product is by Aerosoft who I have come across before being producers of payware for Microsoft Flight Simulator. All I can say about this constantly crashing game is that it lived up to my expectations and its performance limitations killed it stone dead - five crashes to desktop in the space of one hour. From what I understand the sequel to this game is also worth saving your money over for similar reasons. Avoid Avoid Avoid It's definitely one of the better choice of games in a while. One of the things it does well is giving you a good sense of the world your in from the very beginning without being lazy and just using a few pages for exposition at the start. The other thing it does well in the gryphon its self doing a fairly good job making it feel like an actual animal which you would hope going into this. Finally for positives is that the supporting character are well written giving you a good sense of who they are though it is easy to skip over them without meaning to if you focus on your gryphon which i did

As for cons there aren't too many and they tend to not to be too bad. The first is probably the most jarring is the end without going into spoilers its rather abrupt it ends right when it feels like it should be getting into the meat of it but the journey up to that point is still worth it. Finally this one isn't too bad and that is the stats as can be kind of unclear what choices increase what stats particular with the griffon but its not too bad and once you figure it out its fine but it can kind of screw you on your first playthrough this might have just been a me problem

(Sorry if its not the best review it is my first). When I start on Main menu or editor the mouse is all slow and can't pick the speed it meant to be & mouse movement is too fast & I can't do anything!. Even though I've read all the reviews I still bought it when it was 0,45€.

Not worth it.

I hoped it would be like Age of Castles #1, but it's not!

Besides the fact that you can drop down your entire castle and people by losing a fight the computer says you are going to completely win, there is no goal. You can move freely around the map without any purpose. I'm lvl 30 at the moment and still no clue what the hell I'm supposed to do.

Trust me: don't buy it. Go get something else for your 0,45€ cents.

. Not bad but there's no way to fast dodge 1 block space away to dodge the most unfeasible part of the deal

This game is only worth some minutes of your time but i won't blame them! It is quite a good game even without option to dodge or more accurate way to play without just having the speed up and bomb limits that means nothing while it goes too fast or bombs aren't launched faster to go up with the speed of the game

Done!

i expect better games though in the future than just flash out games like these that are worth almost nothing but still fun concept. Having a lot of fun with this one. The soundtrack is lovely, the gameplay is smooth and despite the nostalgic feel of this classic collect 'em, bash 'em platformer it doesn't feel dated at all. Legend of Kay provides relatively simple gameplay without being lackluster, the storyline is pleasant and engaging and though the cutscenes are a little lengthy at times there's hardly any cause for complaint if you're after a fun, easy-going action-adventure game.. If you can buy this game on sales and if you are a fan of nostalgia, this game is a nice option. Just do not expect much. There is NO MULTIPLAYER !
